

DR. DELPHINE D. FITZENZ
Geophysicist, PhD.

Address: 32 rue de la Liberté
F-67114 Eschau
Phone: +33 3 88643532
Email: Delphine.Fitzenz@eost.u-strasbg.fr

EDUCATION

- 1999-2002 PhD student in the Engineering Geology Team, Geology Institute (*ETH- Swiss Federal Institute of Technology, Zurich*).
PhD in Natural Sciences (Naturwissenschaften) 2002.
- Nov. 1998 M.S. Engineer Geophysicist with Honors (Mention Bien), EPGS (*Ecole de Physique du Globe de Strasbourg, France*).
- June 1998 D.E.A. (M.S. Degree) in Physics and Chemistry of the Earth with Honors (Mention Bien), *University of Strasbourg I, France*. Option: *Geophysics*.
- 1995-1998 University Engineering School in Geophysics (EPGS)
- 1993-1995 Mathématiques Supérieures and Mathématiques Spéciales classes (College), Orléans, France.
- 1993 Scientific Baccalauréat C with honors (Mention Bien), L'Isle s/Sorgue, France.

RELEVANT WORK EXPERIENCE

- 11/2005 - Present Research Scientist at the Institut de Physique du Globe de Strasbourg (IPGS), France.
- 10/2004-11/2004 Postdoctoral Research Associate in the Geophysics Department at Stanford University. Advisor: Prof. Norm Sleep.
Project Title: "Model of fault-zone properties from postseismic to pre-failure conditions. Application to a full-cycle quasi-dynamic model of the Big Bend in the San Andreas Fault in Southern California"
Project funded by the Southern California Earthquake Center (SCEC).
- 08/2002-10/2004 Visiting scientist at the *U.S. Geological Survey* (1st year of post-doc funded by a Swiss National Fund fellowship). Advisor: Steve Hickman.
Study and modeling of the time-evolution of the rheological, hydraulic, cohesive, and frictional properties of fault zones during the interseismic period and how this influences the fault behavior. Application to the full-cycle modeling of the San Andreas Fault near Parkfield, CA.
- 1999-2002 PhD student, *Engineering Geology, Geology Institute, ETH Zurich*. Advisors: Prof. S. Loew and Dr. S.A. Miller
Research work: Generalization of a 3-D fluid-driven fault interaction model.
Teaching assistant for the course on 3D geometrical modeling for geologists (GOCAD)
Co-system administrator of the (SGI) UNIX system of the team.
- 07/1998-09/1998 Engineering researcher (M.S. Eng. work), *Laboratoire de Mesures en Forage (Aix-en-Provence, France)*
Improvement of the mineralogical inversion method obtained during the DEA training, computation of profiles of mineralogy, overpressures and permeability for several boreholes.
- 02/1998-06/1998 Diplôme d'Etudes Approfondies (M.S.) researcher, *Laboratoire de Mesures en Forage (Aix-en-Provence, France)*
Mineralogical inversion of downhole measurements of physical properties and characterization of fluids circulation in the Barbados accretionary prism.
- July-Aug 1997 Geophysics Industry Work Experience, *Bureau des Recherches Géologiques et Minières, Luminy - Association Française de génie ParaSismique (Marseille, France)*
Project: Seismic hazard map of the national territory (France)
I contributed to the first probabilistic computation of seismic hazard maps for France.
- Nov-April 1997-98 Geology Research Project, *Institut de Physique du Globe de Strasbourg - Marine Geophysics Laboratory (Strasbourg, France)*
Paleomagnetic study of basalts dragged along the Central Indian Ridge and the link with ridge segmentation.

HONORS and GRANTS

- Marie Curie Reintegration Grant (E.U.) awarded for the 2 year-project entitled: *Quantitative understanding of the interseismic evolution of fault properties: numerical modelling using lab-experiments (FAULTMOD)*, hosted by the IPGS, France, in collaboration with Chris Spiers, University of Utrecht, The Netherlands (2006-2008), 40,000 Euro per year.
- Qualified to apply for "Maitre de conference" French faculty positions in Solid Earth geosciences (sections 35 and 36) for the period 2004-2008.
- INSU grant (7,500 Euro) for the project "Inversion of high-resolution optical images to obtain a dense deformation field: methodological developments" in collaboration with colleagues from the IPGS and Andre Jalobeanu from the LSIT, Strasbourg (Image processing and computer sciences Lab), 2006-2007.
- Post-doc fellowship awarded by the Swiss National Fund, 08/2002-08/2003.
- ETH Medal awarded in 2003 for my PhD thesis. The medal is awarded to the top 5% of all PhD theses submitted each year to ETH (i.e., in all disciplines).
- Scholarship awarded by the Society of Petrophysicists and Well Log Analysts (SPWLA) for my MS. Eng. work, 1998.

SERVICES

- Reviewer for Geophysical Journal International
- Reviewer for Journal of Geophysical Research
- Reviewer for Geophysical Research Letters
- Reviewer for the National Science Foundation

RESEARCH INTERESTS

- Multidisciplinary, integrative modeling approaches to study geological processes and contribute to seismic hazard assessment (Bayesian generative models or inference, propagation of uncertainties, etc.)
 - The relevance of experimental deformation to study in situ interseismic processes, and the role of numerical modelling to bridge the scale-gap between the two.
 - Dense surface deformation fields as a constraint for models of fault-zone rheology
 - Small to micro-earthquakes, in particular repeating earthquakes: indicators of fault-zone rheology?
- Fault mechanics and the role of fluids in faulting
- Time-evolution of fault systems

PRIMARY FIELD EXPERIENCE

- Nov. 2003 Seismic profiling near the San Andreas fault at Parkfield, California.
- Sept 1997 Seismic profiling in the Ligurian Sea, *Observatoire d'Océanologie, Villefranche sur mer, France*;
Geophysical study of a salt dome in South Alsace (seismic, gravimetry, magnetism, electrical sounding), *Geophysics Institute, Strasbourg, France*.

LANGUAGES

I am fluent in English, and can (and have) easily taught colleagues and students in English, and written numerous papers and proposals in English; French is my native language; I also read, write, and speak German; I am a beginner in Romanian.

COMPUTER EXPERTISE

- Computer environments UNIX (use and system management of an SGI workstation network), MAC OSX.
- Programming experience Fortran (77, 90, 95), OpenMP, C, C++, Matlab, Octave, Gnuplot, LaTeX.

CONFERENCE AND WORKSHOP ABSTRACTS (last five years)

- Fitzenz, D.D.; Hickman, S.H., Jalobeanu, A., and C. Spiers, 2007; Probabilistic modeling of earthquake occurrence: first examples of data integration within a Bayesian framework, 5th International Workshop on Statistical Seismology: Physical and Stochastic Modelling of Earthquake Occurrence and Forecasting (EMFCSC, Erice, Sicily, 31 May - 6 June, 2007)
- Fitzenz, D.D.; Hickman, S.H., Jalobeanu, A., and C. Spiers, 2007; Probabilistic modeling of earthquake occurrence: first examples of data integration within a Bayesian framework, EarthScope Annual Meeting, Monterey, CA.
